Title (English) Purification and characterization of polyclonal antibodies against tumour suppressor protein APC		
Title (Swedish)		
Abstract <p>An important part in the fight against cancer is finding high affinity reagents for proteomics research. One protein extensively studied is the tumour suppressor adenomatous polyposis coli or APC, involved in colon cancer. In this project polyclonal antibodies against APC from immunized rabbits were purified. The antibodies were found to be useful in western blot analysis, immunoprecipitation of native APC and immunocytochemistry.</p>		
Keywords <p>Antibody purification, APC, Biosensor analysis, proteomics</p>
