PhD student in Ecology and Evolution Stockholm

Ref. No. SU FV-0230-20

Apply

Research and education at Stockholm University at the Department of Ecology, Environment and Plant Sciences (DEEP) is located in the Arrhenius Laboratories, situated at the University Campus at Frescati. Research carried spans across a broad range of biology subject areas including Ecology and Evolution, Ecotoxicology, Marine Biology, Plant Physiology and Plant Systematics. Presently around 140 people are working at DEEP using state-of-the-art methodologies in an international research environment characterized by world-recognized researchers and a high level of professionalism.

Project description
The Department of Ecology, Environment and Plant Sciences invites applications for a four-year PhD position part of the project Gut microbiomes and plant-host-parasitoid interactions.

The general aim of the project is to study how the gut microbiome affects the ecology and evolution of the host, both host plant use and the ability to defend against parasitic wasps, in a phylogenetic context. The PhD-project aims to (i) sequence the gut microbiome to find differences in microbiome community composition between host species, (ii) identify mechanisms whereby the gut microbiome is transferred between generations (mainly between adult and larvae), (iii) study how the gene expression within the host depends on the microbiome community composition in relation to host plant use and to defense mechanisms against parasitic wasp attack. The project will involve a set of leaf beetle species, their host plants and the parasitic wasps attack beetle larvae. Within the project group, there is more than 20 years’ experience in working with the system, including a thorough understanding of the ecological and physiological processes affecting species interactions as well as a comprehensive genomic background information (involving both DNA- and RNA-sequencing).

Qualification requirements
In order to meet the general entry requirements, the applicant must have completed a second-cycle degree, completed courses equivalent to at least 240 higher education credits, of which 60 credits must be in the second cycle, or have otherwise acquired equivalent knowledge in Sweden or elsewhere.

In order to meet the specific entry requirements, the general syllabus for doctoral studies in the field of Ecology and Evolution stipulates, that applicants must have completed at least 60 higher education credits in the second cycle, of which 15 credits must be from a course in one of the areas Ecology or Evolution, and 30 credits from a project in one of the areas Ecology or Evolution. Applicants may also have otherwise acquired equivalent knowledge in Sweden or elsewhere.

The qualification requirements must be met by the deadline for applications.

Selection
The criteria used in the selection for admittance to research training in Ecology and Evolution are knowledge of theory and applications in the research field, ability to communicate orally and in writing, knowledge of English, creativity, analytic competence, initiative, independence and collaboration ability.

Additional merits include previous experiences working with molecular tools (DNA/RNA-extraction) and bioinformatic analyses.

Admission Regulations for Doctoral Studies at Stockholm University are available at: www.su.se/rules and regulations.

Terms of employment
Only a person who will be or has already been admitted to a third-cycle programme may be appointed to a doctoral studentship.
The term of the initial contract may not exceed one year. The employment may be extended for a maximum of two years at a time. However, the total period of employment may not exceed the equivalent of four years of full-time study.

Doctoral students should primarily devote themselves to their own education, but may engage in teaching, research, and administration corresponding to a maximum of 20% of a full-time position.

Please note that admission decisions cannot be appealed.

Stockholm University strives to be a workplace free from discrimination and with equal opportunities for all.

Contact
For more information, please contact project leader Peter Hambäck, telephone: +46 730 76 51 26, peter.hamback@su.se. Further information about the position can be obtained from the Subject Representative Johan Ehrlén, telephone: +46 8 16 12 02, johan.ehrlen@su.se.

Union representatives
Ingrid Lander (Saco-S), telephone: +46 708 16 26 64, saco@saco.su.se, Alejandra Pizarro Carrasco (Fackförbundet ST/Lärarförbundet), telephone: +46 8 16 34 89, alejandra@st.su.se, seko@seko.su.se (SEKO), and PhD student representative, doktorandombud@sus.su.se.

Application
Apply for the position at Stockholm University’s recruitment system by clicking the "Apply" button. It is the responsibility of the applicant to ensure that the application is complete in accordance with the instructions in the job advertisement, and that it is submitted before the deadline. We recommend that you hand in your application, including necessary documents, in English.

Please include the following information with your application

- Your contact details and personal data
- Your highest university degree
- Your language skills
- Contact details for 2–3 reference persons

and, in addition, please include the following documents

- Cover letter (2-3 pages), containing
  - Your expectations from, and intentions with the education
  - Why you are interested in the specific project
  - What makes you suitable for the specific project
- CV – degrees and other completed courses, work experience and a list of degree projects/theses
- Degree certificates and grades confirming that you meet the general and specific entry requirements (no more than 6 files)
- Degree projects/theses (no more than 6 files).

The instructions for applicants are available at: Instructions – Applicants.

You are welcome to apply!

Stockholm University contributes to the development of sustainable democratic society through knowledge, enlightenment and the pursuit of truth.

Closing date: 24/02/2020
