The six-year (2020–2026) project LIFEPLAN is currently in its start-up phase, and thus actively recruiting across partner institutions. At present, we have several positions open as PhD student, postdoc, coordinator and research assistant. These positions are hosted by the Swedish University of Agricultural Sciences in Uppsala, Sweden (PI Tomas Roslin), the University of Helsinki, Finland (PI Otso Ovaskainen), and Duke University, USA (PI David Dunson).

The post doc and PhD positions span the fields of
- statistical ecology: [https://www.helsinki.fi/fi/node/87178](https://www.helsinki.fi/fi/node/87178)
- ornithology: [https://www.helsinki.fi/fi/node/87180](https://www.helsinki.fi/fi/node/87180)
- molecular-based fungal community ecology: [https://www.helsinki.fi/fi/node/87179](https://www.helsinki.fi/fi/node/87179)

In Uppsala, there are also openings as

For a summary of all open positions, please see

In addition, the Duke team is looking for PhD students and postdoctoral researchers focusing on the development of novel statistical methods for big and complex data. Interested candidates should contact prof. Dunson (dunson (at) duke.edu) for more information.

Please forward to anyone that you think might be interested!

Best wishes,

Tomas Roslin
