The colorful birds from the left side are living in the city worldwide. City greenspaces could provide nature experience for us, at the same time, can also bring habitats for those lovely creatures.

We are currently studying how to develop the city greenspace design, which could both fit on demands from the people and wild birds in Uppsala and Stockholm. And now, we are wishing for your help!

How do you like the greenspaces in the city?

Steps: Scan the QR code Fill simple online survey of city green space Get phone wallpapers and stories of urban wildlife!
