PhD student in Plant Physiology

Ref. No. SU FV-3713-20

Research and education at Stockholm University at the Department of Ecology, Environment and Plant Sciences (DEEP) is located in the Arrhenius Laboratories, situated at the University Campus at Frescati. Research carried spans across a broad range of biology subject areas including Ecology and Evolution, Ecotoxicology, Marine Biology, Plant Physiology and Plant Systematics. Presently around 140 people are working at DEEP using state-of-the art methodologies in an international research environment characterized by world-recognized researchers and a high level of professionalism.

Project description

The Department of Ecology, Environment and Plant Sciences invites applications for a four-year PhD position part of the project "The first steps toward squash with nitrogen-fixing root nodules". The position will be associated with the long-term research on nitrogen-fixing root nodule symbioses in the research group of Katharina Pawlowski (www.su.se/english/profiles/kpawl-1.192435).

The overall aim of the research is to understand the evolution of nitrogen-fixing root nodule symbioses and which plant features are required to evolve such a symbiosis. The core of the PhD project is to investigate the induction of nodules on the model species for actinorhizal Cucurbitales, Datisca glomerata, and to confirm certain features by comparative analyses of the corresponding genes in another actinorhizal genus from Cucurbitales, Coriaria (Coriariaceae). The main training will be in laboratory work (isolation of DNA and RNA from plants and bacteria, real time RT-PCR, molecular cloning, cytological analyses, tissue culture). The work will also involve phylogeny and bioinformatics.

Qualification requirements

In order to meet the general entry requirements, the applicant must have completed a second-cycle degree, completed courses equivalent to at least 240 higher education credits, of which 60 credits must be in the second cycle, or have otherwise acquired equivalent knowledge in Sweden or elsewhere.

In order to meet the specific entry requirements, the general syllabus for doctoral studies in the field of Plant Physiology stipulates, that applicants must have completed at least 60 higher education credits in the second cycle, of which 15 credits must be from a course in Plant Physiology, and 30 credits from a project in Plant Physiology. Applicants may also have otherwise acquired equivalent knowledge in Sweden or elsewhere.

The qualification requirements must be met by the deadline for applications.

Selection

The criteria used in the selection for admittance to research training in Plant Physiology are knowledge of theory and applications in the research field, subject knowledge and experimental proficiency with relevance for the research project, ability to communicate orally and in writing, knowledge of English, creativity, analytic competence, initiative, independence and collaboration ability. The candidate should have practical experience in plant molecular biology. Experience in plant cytology, biochemistry and bioinformatics would be a plus.

Admission Regulations for Doctoral Studies at Stockholm University are available at: www.su.se/rules and regulations.

Terms of employment

Only a person who will be or has already been admitted to a third-cycle programme may be appointed to a doctoral studentship.

The term of the initial contract may not exceed one year. The employment may be extended for a maximum of two years at a time. However, the total period of employment may not exceed the equivalent of four years of full-time study.
Doctoral students should primarily devote themselves to their own education, but may engage in teaching, research, and administration corresponding to a maximum of 20% of a full-time position.

Please note that admission decisions cannot be appealed.

Stockholm University strives to be a workplace free from discrimination and with equal opportunities for all.

**Contact**
For more information, please contact project leader Katharina Pawlowski, telephone: +46 8 16 3772, katharina.pawlowski@su.se. Further information about the position can be obtained from the co-supervisor Rachel Foster, telephone: +46 8 16 1207, rachel.foster@su.se.

**Union representatives**
Ingrid Lander (Saco-S), telephone: +46 708 16 26 64, saco@saco.su.se, Alejandra Pizarro Carrasco (Fackförbundet ST/Lärarförbundet), telephone: +46 8 16 34 89, alejandra@st.su.se, seko@seko.su.se (SEKO), and PhD student representative, doktorandombud@sus.su.se.

**Application**
Apply for the position at Stockholm University's recruitment system. It is the responsibility of the applicant to ensure that the application is complete in accordance with the instructions in the job advertisement, and that it is submitted before the deadline. We recommend that you hand in your application, including necessary documents, in English.

Please include the following information with your application

- Your contact details and personal data
- Your highest university degree
- Your language skills
- Contact details for 2–3 reference persons

and, in addition, please include the following documents

- Cover letter (2-3 pages), containing
  - Your expectations from, and intentions with the education
  - Why you are interested in the specific project
  - What makes you suitable for the specific project
- CV – degrees and other completed courses, work experience and a list of degree projects/theses
- Degree certificates and grades confirming that you meet the general and specific entry requirements (no more than 6 files)
- Degree projects/theses (no more than 6 files).

The instructions for applicants are available at: [How to apply for a position](https://www.su.se/english/about-the-university/work-at-su/available-jobs/phd-student-positions-1.507588?rmpage=job&rmjob=13226&rmlang=UK).

**You are welcome to apply!**

*Stockholm University contributes to the development of sustainable democratic society through knowledge, enlightenment and the pursuit of truth.*

**Closing date:** 15/01/2021
