Doctoral student in single cell proteomics 1

School of Engineering Sciences in Chemistry, Biotechnology and Health

KTH Royal Institute of Technology in Stockholm has grown to become one of Europe’s leading technical and engineering universities, as well as a key centre of intellectual talent and innovation. We are Sweden’s largest technical research and learning institution and home to students, researchers and faculty from around the world. Our research and education covers a wide area including natural sciences and all branches of engineering, as well as architecture, industrial management, urban planning, history and philosophy.

Project description

Third-cycle subject: Biotechnology

We are looking for a PhD-student for a project aimed to map spatiotemporal variations of the human proteome at a single cell level in human, and to understand the functional consequences of these variations. The position may include work with cell cultivation, tissue preparation, antibody-based assays, mass spectrometry, confocal microscopy, highly multiplexed microscopy, bioinformatics and computational image analysis.

One of the positions will be focused on the mapping of dynamic spatiotemporal protein fluctuations related to cell states in pancreas from healthy and type-1 diabetic donors. The other position will be focused on method development for improved single cell technologies through integration of imaging and mass spectrometry driven by AI based cell segmentation.
Supervision: The doctoral student will be supervised by Prof. Emma Lundberg in close collaboration with the Human Protein Atlas project (www.proteinatlas.org) and the Cell Profiling team consisting of 15 research engineers, PhD-students, postdocs and researchers. The placement will be at Science for Life Laboratory (http://www.scilifelab.se), a national center for molecular biosciences with focus on health and environmental research.

What we offer

- The possibility to study in a dynamic and international research environment in collaboration with industries and prominent universities from all over the world. Read more
- A workplace with many employee benefits and monthly salary according to KTH’s Doctoral student salary agreement.
- A postgraduate education at an institution that is active and supportive in matters pertaining to working conditions, gender equality and diversity as well as study environment.
- Work and study in Stockholm, close to nature and the water.
- Help to relocate and be settled in Sweden and at KTH.
- Work in international research consortia, such as an EU project for mapping healthy pancreas and an NIH project for mapping type-1 diabetic pancreas.
- Work in close collaboration with one of the largest biological databases in the world, the Human Protein Atlas.

Eligibility

To be admitted to postgraduate education (Chapter 7, 39 § Swedish Higher Education Ordinance), the applicant must have basic eligibility in accordance with either of the following:

- passed a degree at advanced level,
- completed course requirements of at least 240 higher education credits, of which at least 60 higher education credits at advanced level, or
- in any other way acquired within or outside the country acquired essentially equivalent knowledge.
- Requirements for English equivalent to English B/6, read more here.

Selection

In order to succeed as a doctoral student at KTH you need to be goal oriented and persevering in your work. During the selection process, candidates will be assessed upon their ability to:

- independently pursue his or her work
- collaborate with others,
- have a professional approach and
- analyse and work with complex issues.
- Laboratory experience with the techbiques listed above are meriting, as are programming skills.
- Good communication skills in English (oral and written)
After the qualification requirements, great emphasis will be placed on personal qualities and personal suitability.

**Target degree:** Doctoral degree

**Information regarding admission and employment**

Only those admitted to postgraduate education may be employed as a doctoral student. The total length of employment may not be longer than what corresponds to full-time doctoral education in four years' time. An employed doctoral student can, to a limited extent (maximum 20%), perform certain tasks within their role, e.g. training and administration. A new position as a doctoral student is for a maximum of one year, and then the employment may be renewed for a maximum of two years at a time.

**Union representatives**

You will find contact information for union representatives on [KTH's website](#).

**Doctoral section (Students’ union on KTH Royal Institute of Technology)**

You will find contact information for doctoral section on the [section's website](#).

**Application**

Apply for the position and admission through KTH's recruitment system. It is the applicant’s responsibility to ensure that the application is complete in accordance with the instructions in the advertisement.

Applications must be received at the last closing date at midnight, CET/CEST (Central European Time/central European Summer Time).

Applications must include the following elements:

- CV including your relevant professional experience and knowledge.
- Application letter with a brief description of why you want to pursue research studies, about what your academic interests are and how they relate to your previous studies and future goals. (Maximum 2 pages long)
- Copies of diplomas and grades from previous university studies and certificates of fulfilled language requirements ([see above](#)). Translations into English or Swedish if the original document is not issued in one of these languages.
- Representative publications or technical reports. For longer documents, please provide a summary (abstract) and a web link to the full text.

**Other information**

Striving towards gender equality, diversity and equal conditions is both a question of quality for KTH and a given part of our values.
For information about processing of personal data in the recruitment process please read here.

We firmly decline all contact with staffing and recruitment agencies and job ad salespersons.

Disclaimer: In case of discrepancy between the Swedish original and the English translation of the job announcement, the Swedish version takes precedence.
